

MARK YOUR CALENDAR!

The Deactivation & Decommissioning Focus Area (DDFA) Fiscal Year 2000 Mid-Year Review

will be held

March 28-30, 2000

at the

National Energy Technology Laboratory (NETL)
Morgantown, West Virginia

NETL is the lead field organization for the DDFA, one of five focus areas in the DOE Office of Science and Technology for Environmental Management (EM). The goal of DDFA is to identify, develop, demonstrate and assist in deploying improved technologies and solutions that reduce costs; reduce risks to the public and the environment; and accelerate schedules for deactivation, decontamination and decommissioning of radiologically contaminated surplus facilities. Progress of over fifty technical projects will be presented at the FY 2000 Mid-Year Review. We look forward to your participation.

Additional information will be forwarded to you in January 2000.
